

Most water use and waste occurs outdoors!

We can make a big impact in the amount of water we use everyday by making some simple changes. Take the following actions to see how much water you can spare each day.

SAVE EVEN MORE!

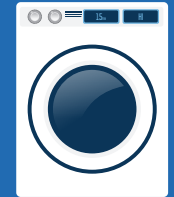

Reduce outdoor watering during fall and winter months to one day per week (Saturday or Sunday).

Water with the weather. If rain is in the forecast, be sure to turn-off sprinklers for one week.

Capture shower or bathtub warm-up water and use it to water trees and landscape plants.

Rebates for high efficiency toilets, washing machines and landscaping are available. Call 311 or visit sparesacwater.com for more information.

CONSULT WITH A CONSERVATION SPECIALIST!

Do you use more than 400 gallons per day and are not sure why? Call 311 for a Water Wise House Call. A Water Conservation Specialist will visit your property to:

SET SPRINKLER TIMERS

PROVIDE WATER SAVING TOOLS

GET YOU PRE-QUALIFIED

To schedule your free Water Wise House Call, call 311 or (916) 264-5011

CARING FOR TREES

Conserve water and keep your trees healthy by following these simple tips. For more tree preservation information, visit sactree.com

CHECK THE SOIL

Use a screwdriver to check six inches deep near the drip line - if soil is wet or sticky, allow to dry before watering again.

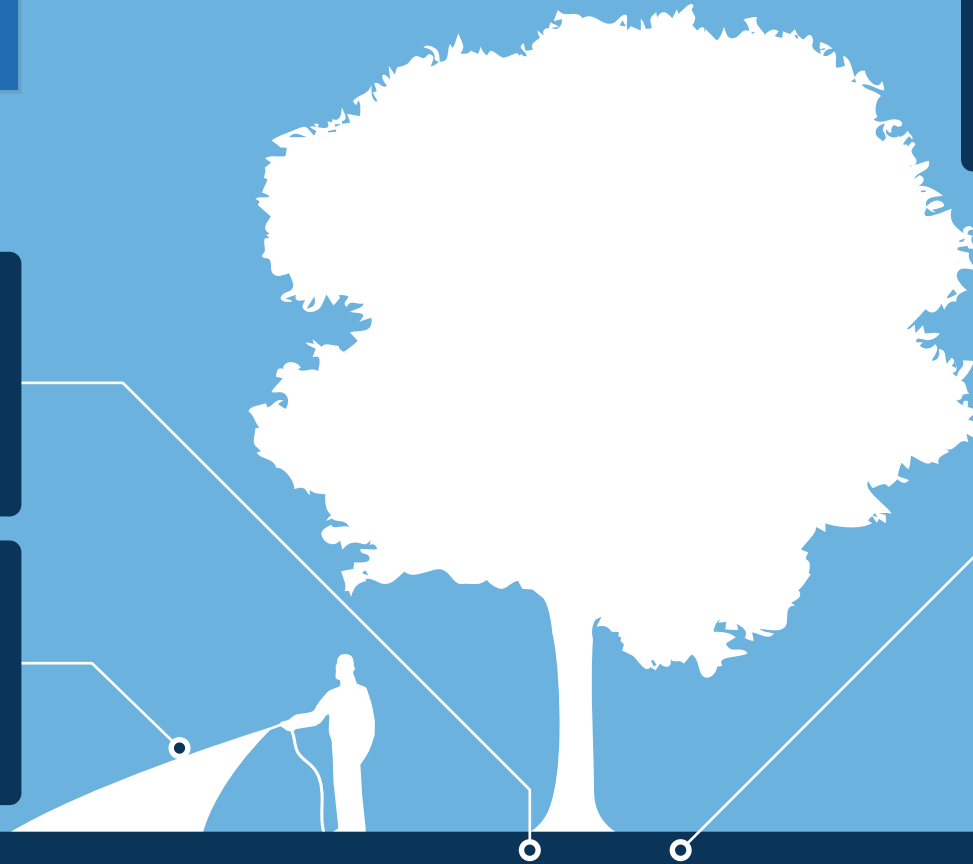

KNOW THE WATERING RULES FOR YOUR AREA

Learn about the City's odd/even watering schedule by visiting www.sparesacwater.org

REDUCE WATER EVAPORATION

Promote healthy roots by adding a two to four inch layer of mulch around the base of your trees.
